

LBB 4173/00 Intercom

- ▶ Enables private, two-way conversations between delegates, chairmen, interpreters and other PC users
- ▶ Search facility to locate delegates
- ▶ Allows up to 23 simultaneous conversations
- ▶ Simple menus for ease of control
- ▶ On-screen help facility

The Intercom software module forms the basis of a communication system that allows conference participants to hold two-way private conversations. It provides a means of setting up and controlling intercom calls between delegates, chairmen, interpreters and other PC-users during a conference.

It allows several types of calls to be made:

- Participant to / from operator
- Between participants
- Interpreter to/from operator
- Between interpreters
- Participant to/from interpreter
- Between PC operators in a multi-PC system

Functions

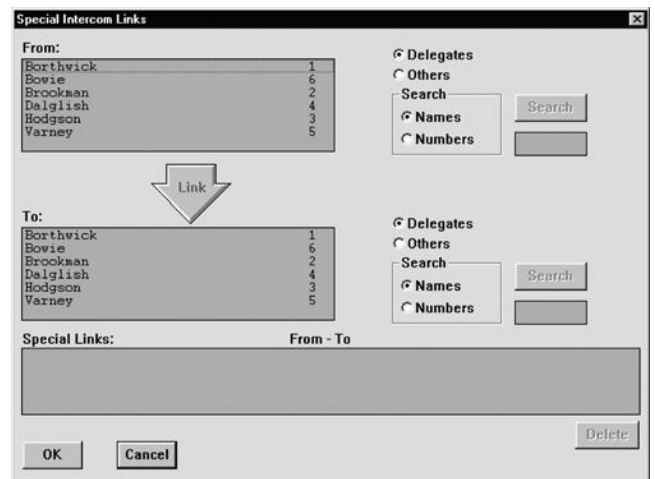

The Intercom software is used in combination with the Intercom Handset and Cradle. It provides assistance in both the pre-conference creation of an intercom network, and the routing and controlling of intercom calls once the conference is underway. Preparation work includes assigning special intercom links between participants, interpreters or both. Once the conference is taking place, the operator can establish and re-route intercom calls via simple on-screen windows. Each intercom link uses a system channel. The maximum

number of intercom links is 5. If no intercom links are assigned, the intercom stop module will not start.

Note The number of DCN Next Generation audio channels available for intercom purposes is set using the System Installation software LBB 4185/00.

Note Delegate Database LBB 4180/00 is required if delegate names are used.

Note Simultaneous interpretation LBB 4172/00 is required if interpreter names are used.
