

LBB 4190/00 Startup

- ▶ Setting master volume levels
- ▶ Opening, closing and deleting Installation File
- ▶ Configuring the Startup program to automatically load selected DCN Next Generation modules
- ▶ Accessing, acknowledging and printing error messages
- ▶ On-screen help facility

The Startup screen is active whenever DCN Next Generation software modules are used for controlling and monitoring. This module is different from other DCN Next Generation software modules as it is primarily used as a platform from which the other modules are selected. However, this is only one aspect of Startup. The following can also be carried out:

Functions

When Startup is loaded, it presents the user with a desktop window that is the DCN Next Generation opening screen. The other DCN Next Generation modules are represented by icons in this opening screen, and activated simply by clicking on them. Startup also has a facility, which allows other DCN Next Generation modules to be loaded automatically. This saves having to manually select modules that are used virtually every time the DCN Next Generation system is in operation. The user can specify any combination of modules for automatic Startup.
